**DETAILED ACTION**

***Response to Amendment***

1. Receipt is acknowledged of the Appeal Brief filed April 15, 2005.

***Allowable Subject Matter***

2. Claims 1 and 45-63 are allowed.

The following is an examiner's statement of reasons for allowance: the closest prior art of record, Coutts (US 5,563,393); Haycock (US 6,065,672) taken alone or in combination of other references, does not teach or fairly suggest the claimed apparatus and method comprising, among other things, an automated banking machine network including a plurality of automated banking machines each having a plurality of currency cassettes. Each of the cassette includes at least one data indicator that is read remotely by at least one cassette reader without contact therebetween.

The network is operative to track the amount of currency in at least one of the automated banking machines. Coutts discloses a plurality of data sensors located inside of an ATM instead of the data indicating the level of currency in a cassette coming from the cassette. Coutts is silent about a cassette reader that is not separate from the ATM. Haycock reference does not cure the deficiency of Coutts reference. Accordingly, one of ordinary skill in the art would not have been motivated to modify teachings of prior art to meet the claimed limitations as set forth in the present claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
